## Introduction:

The purpose of this document is to describe the requirement specification for The Shtick's new website

The intended audience for this document is anyone surfing the web who might come across this new up and coming band. The website will be easy to understand and accessible to all.

## Definitions, Acronyms, and Abbreviations:

*Same for the client:*

ER diagram – a diagram to represent the data you want to save with our system

W3 validation – refers to both Html and Css validation tool provided by the w3c.org. the html validator is located at:

<http://validator.w3.org/>

with the CSS validator located at:

<http://jigsaw.w3.org/css-validator/>

## Overall Description:

The Schitck's website is the home-base website, which provides all the information one might need on this new band. Includes pages for the band's music, upcoming tour dates, reviews of their music, form to stay updated on the band's adventures, and home page

## Specific Requirements:

1. Main title: The Schtick
2. Meta Character Set: UTF-8
3. Main logo:
4. Form page including:
  - a. Email text box
  - b. First name text box
  - c. Comments text area
  - d. How you found the band
  - e. Email preferences radio button
  - f. Home state (list box)
  - g. Email/save user data
  - h. Provides feedback if user filled out form incorrectly
5. Tour page including reading data from CSV file for concert data, location, venue name, and time
6. About Us page including short bios about all members of the band
7. Music page which includes photos of the band's albums and a link to sperate php file detailing songs on that album (5 separate php files)
8. Home page which welcomes user and has 1-2 photos
9. Reviews page which includes short reviews of each of the band's albums
